

BONGANI XOLANI MACU

Location: Pretoria / Johannesburg, South Africa

Phone: +27 63 396 4117

Email: bonganimacu11@gmail.com

Languages: English (Fluent), Zulu (Native)

Portfolio: <https://portfolio-xolani.netlify.app/>

PROFESSIONAL SUMMARY

A highly motivated Multimedia Computing Graduate with comprehensive expertise in web development, UI/UX design, 3D animation, digital marketing, and cloud technologies. Skilled in transforming concepts into interactive content, data-driven solutions, and visually compelling media. Demonstrates strong analytical thinking, creativity, and the ability to work in technical and creative environments. Passionate about building user-centered experiences and leveraging technology for digital innovation.

EDUCATION

Diploma in Multimedia Computing (NQF Level 6)

Tshwane University of Technology (Completed 04 April 2025)

- **Core strengths:** 3D Modelling, Object-Oriented Programming, Web Computing, Motion Graphics, VFX, Database Development, Interactive Virtual Environments, Mobile development.

TECHNICAL SKILLS

Web & Software Development:

- HTML, CSS, JavaScript, Java, Unity Game Engine, C#, React, Angular.
- Git & GitHub

Multimedia & Design:

- Blender (3D modelling, sculpting, rigging, building design, cinematic animation)
- Adobe Photoshop (graphic design, digital imaging)
- Adobe After Effects (post-production, VFX, motion graphics)
- Figma (UI/UX design, wireframes, prototypes)

Data & Cloud Technologies:

- Python, R, SQL
- Power BI, Excel
- AWS, Azure Cloud Fundamentals
- UiPath, Automation Anywhere (process automation)

Soft Skills:

- Creativity, Problem-Solving, Communication, Team Collaboration, Attention to Detail, Time Management, Scrum, Agile, Jira.

PROJECTS

1. Digital Marketing & Social Media Campaigns

- Designed visual marketing materials, animated posts, and brand-aligned content.
- Conducted analytics-based improvements to maximize engagement.
- Tools: Photoshop, After Effects, Canva, Meta Business Suite, Google Ads.

2. Blender 3D Animation & Architectural Visualisation

- Created cinematic 3D animations with lighting, textures, and camera systems.
- Modelled realistic buildings, environments, and city-like structures.
- Exported assets for use in Unity game environment.

3. Unity Interactive Demo

- Developed an interactive 3D scene with movement controls and physics interactions.
- Integrated Blender-based 3D assets.
- Demonstrated understanding of game mechanics and environment building.

4. Java Software Projects

- Built OOP-based Java applications including calculators, mini-games, backend and GUI utilities.
- Practiced data structures, object management, and modular programming, mobile Application

.

CERTIFICATIONS & VERIFICATION

- Diploma in Multimedia Computing (TUT)

DYNAMICDNA

System development (2026-02 – Current)

- Communication, Agile, Scrum
- C# & Java
- HTML, CSS, JAVASCRIPT, MYSQL
